ECV High Lift Pallet Truck Detailed Photos

Fatigue-free operation thanks to easy-grip tiller for both left- and right-handed operators

Easily cross thresholds thanks to the optional initial lift for more ground clearance on the ECV 10iC, whilst maintaining safety on the move thanks to lift-height-dependent speed reduction

The built-in charger ensures maximum availability and enables decentralised charging, with clear visibility of battery status and operating hours thanks to the LED display

Low service weight enables use on mezzanine floors or in freight lifts and low frame construction for maximum operator safety

Lift heights of up to 3,227 mm facilitate a high degree of storage capacity

Compact front end dimensions for maximum manoeuvrability even in the narrowest working aisles with excellent stability thanks to the 4-wheel undercarriage

Rounded fork tips for fast and precise positioning into the pallets

Increased productivity thanks to the optimum view of the forks during stacking in racks

ECV High Lift Pallet Truck Lifting Made Easy

High turnover performance: Lifting capacity up to 1,000 kg and lift heights up to 3,227 mm

Maximum availability: Long battery life and built-in charger for easy charging

Manoeuvrable and compact: Small front end enables excellent manoeuvrability and usage in narrow aisles

ECV 10

Reaching new heights: With the ECV 10 you can reach a lift height of up to 3,227 mm. Paired with a maximum lifting capacity of up to 1,000 kg, the ECV 10 high lift pallet truck provides ideal support for light and sporadic stacking applications. The compact truck dimensions enable transporting and stacking even in tight working areas and narrow aisles. Two 12 V batteries provide 125 ampere hours for long operating times, and with its built-in charger, the ECV 10 can be recharged at any standard power socket. The LED display shows the current battery charge status and the operating hours, so the operator

always has everything in sight. The ECV 10 also performs well in terms of safety. The wide view between the lift profiles allows for an optimum view of the fork tips. In addition, the lowered design of the vehicle frame protects the feet of operators and third parties. The ECV 10 is also equipped with automatic speed reduction based on lift height, to keep you safe when driving. All functions can be operated with equal ease by left- and right-handed operators thanks to the optimised shape of the tiller.

Flexible down to the tips of the forks: Be it light stacking tasks up to 1,867 mm or used as a mobile workbench

Our most compact high lift pallet truck: Because of the extremely small front end it impresses even in the tightest working areas

Go anywhere: With the optional initial lift on the ECV 10iC variant, slopes and thresholds are easily mastered

ECV 10C / ECV 10iC

Are you looking for a starter truck in the world of pallet stackers? Allow us to introduce the ECV 10C, our most compact high lift pallet truck which can master applications in the narrowest working areas with ease. The mono mast provides the best possible view of the fork tips so the operator can position them accurately into the pallet. The compact ECV 10C is also equipped with automatic lift-height-dependent speed reduction for maximum transport safety. With a mono mast and a maximum lifting capacity of up to 1,000 kg it can be used for a wide range of applications. Whether being used for stacking applications up

to 1,867 mm or to provide ergonomic support as a mobile workbench, the ECV 10C is an all-rounder. The easy-grip tiller for left- and right-handed operators enables precise operation of all of the driving and lifting functions. The ECV 10C also performs well in terms of availability because it always has the necessary amount of power thanks to its built-in charger. The battery can be recharged conveniently and simply at any standard socket. The ECV 10iC version of the compact high lift pallet truck is optionally available with initial lift function for easy negotiation of thresholds, uneven surfaces and ramps.

ECV High Lift Pallet Truck

The 'Simply Efficient' factors: Performance attributes as a measure of economic efficiency

Simply easy

- Handle gradients with ease thanks to the optional initial lift function on the ECV 10iC
- Low service weight enables smooth steering
- Both left- and right-handed users can intuitively operate all of the driving, lifting and lowering functions
- Tandem load rollers provide for smooth driving behaviour on uneven ground
- Low steering forces when manoeuvring relieve the stress on the operator

Simply powerful

- Effective goods handling thanks to a load capacity of up to 1,000 kg
- High degree of storage compression thanks to maximum lift heights of up to 3,227 mm on the ECV 10
- Maintenance-free batteries save precious time

Simply safe

- Optimum stability thanks to four-wheel chassis
- Optimum view of the forks thanks to free view mast or mono mast
- Fatigue-free operation of all driving, lifting, and lowering functions for both left- and right-handed operators

- The low chassis frame protects the feet of operators and third parties in public areas
- Lift height-dependent speed reduction increases safety
- No battery gassing – this protects operators and the environment

Simply flexible

- Compact front end enables use in tight working areas and narrow aisles
- Possible use on mezzanine floors due to low service weight
- The built-in charger allows for flexible and decentralised charging of the forklift truck

Simply connected

- Battery charge display: Battery status is quick and easy to read so batteries can be charged in good time whenever necessary
